

THE JIMMY BY VEIGEL

The Jimmy by **Veigel** is a seat belt assist device designed to aid drivers and passengers with buckling and unbuckling the seat belt buckle in an automobile. The Jimmy's ergonomic design is light weight and easy to use. **Buckling:** The ergonomic joystick grip gives you more control to easily engage the buckle. **Un-Buckling:** Simply pull back on The Jimmy lever while pressing the release button to effortlessly disengage the buckle. **Safety:** Pulling back on the lever alone will not disengage the buckle. The release button has been designed to prevent unintended disengagement of the buckle.

FEATURES

- Light weight ergonomic design for maximum comfort
- Safety release button prevents unintended disengagement of the buckle
- Vehicle specific mounting brackets ensure a safe fit and no damage to your automobile safety belt buckle

APPLICATIONS

Specific applications available to fit most vehicles

INSTALLATION

- Installation is quick and easy – within minutes
- Simply clamp the vehicle specific side brackets to the male side of the buckle
- Installation is non-destructive
- Can be removed without damage to the factory belt buckle
